that attend the events.**

Toxic.Free.Home.

What are Household Hazardous Waste Products?

A product is hazardous when its use or disposal poses a threat to your health or the environment. To help you identify these hazardous products, federal law requires them to be labeled with warning about their use, storage and disposal. The words

- ⇒ "Danger" (most toxic)
- ⇒ "Warning"
- ⇒ "Poison"
- ⇒ "Caution" (least toxic)

are used to help identify the various degrees of toxicity. These words and the properties that make the product hazardous are listed to help you use these products safely.

What should you do?

1. Identify which items are hazardous household wastes.
2. Set aside the products you will use and which need to be disposed of
3. DO NOT dispose of any chemicals, petroleum products or other hazardous wastes down the drain or on the ground. **IT IS AGAINST THE LAW.**
4. Bring your Hazardous Products to the **Household Collection Day!**

For more information

Please call the Hampton Public Works Department at (603) 926-3202 or reach out to the New Hampshire Department of Environmental Services Hazardous Waste Management Bureau at hwcomp@des.nh.gov or (603) 271-2942.

How can you be safe in transporting Hazardous materials?

Be sure that the waste is in its original container and the containers are sound and not leaking. If a container is leaking place entire container into a larger container of the same type.

Check that the products are packaged closely in a sturdy open box so they will not spill. Do not use plastic bags.

Always keep anti-freeze, waste oil and other auto products separated.
