

November 24, 2021

The Town of New Castle has negotiated a change order with N. Granese and Sons, Inc. to construct water mains on Mainmast Circle and Locke Road. The new water mains will connect two dead end mains. This looping will strengthen the distribution system and eliminate the existing dead end mains. Work is anticipated to begin during the week of November 29<sup>th</sup>. We do not yet have a firm start date but will keep you updated.

The Town of New Castle has also entered into an agreement with EVROKS Corporation to repair the rusted areas of the Sawtelle Bridge where we had removed the old water main pipe hangers and replaced them with new ones. Work is scheduled for the week of December 6 and will involve the closure of the southbound lane (heading toward New Castle) during the day time hours when work is being performed.
